Repetitions Crack For Windows is a spaced repetition system that helps you memorize content. Use flashcards for feasible learning Create, edit, and delete flashcards Connect with cloud Sync between devices Read more Interactive learning is an educational model in which students are able to be active and engaged in learning. Through this, students will be able to find the right approach to learning while moving away from the traditional concept of passive learning. Benefits With interactive learning, students are able to move away from the passive model and have an interactive learning experience. Interactive learning gives students more opportunity to ask questions, speak up and engage in learning. Through this, students are able to problem solve when they have problems with the course. Students are able to collaborate and communicate with others in class, gain more understanding of the subject matter. Interactive learning also allows for student centered learning which means students have more choice over the learning experience. Students are able to customize their learning experience. Interactive learning gives students a more effective learning experience According to National Center for Education Statistics data from 2009, students who were engaged in interactive learning scored higher than their peers on their standardized tests and reported enjoying their learning experience. Interactive learning helps with student's future success Students who have an interactive learning experience are more likely to go into post-secondary education. According to a study, students who participated in an interactive learning environment will earn less debt and will have higher graduation rates. With interactive learning, students are able to move away from the traditional concept of passive learning. Discussion What is an interactive learning environment? An interactive learning environment is a learning environment that is created with students in mind. The environment gives students an opportunity to ask questions, speak up, and interact with the content. The environment should also give students choice. If students have choice in the learning environment, they will feel more comfortable in the learning environment and are more likely to ask questions and speak up. What are the benefits of an interactive learning environment? With an interactive learning environment, students are more likely to ask questions and speak up. In an interactive learning environment, students feel more comfortable. This allows them to gain more understanding of the subject matter. Interactive learning environment allows for student-centered learning Students have more choice in an interactive learning environment. They can customize their learning environment which allows them to have more control over their learning experience. Students who participate in an interactive
